

Graphene Coating

AVAILABLE SIZE(S): (12) 2 oz DL6210

DESCRIPTION:

Mighty VS7[®] Graphene Coating is an easy to use graphene ceramic coating. Useable over all exterior surfaces, features a long dwell/work time, and wipes off effortlessly without streaking. Enhances depth of gloss and improves protection against environmental elements.

The coating is a dual function molecule which chemically bonds to the clear coat of the vehicle. The formula uses world leading pure silica, combined with graphene, to create the almost impenetrable protective layer. The inorganic end of the molecule forms the hard, chemical bond with the clear coat, while the organic end of the molecule creates the hydrophobic end. This dual functionality allows the clear coat to become resistant to environmental elements, such as acid rain, bird droppings, fallout, and ultraviolet degradation.

FEATURES:

- Chemical & wear resistant
- Gives years of protection
- Enhanced color & depth of gloss
- Reduces dirt build up
- Extremely hydrophobic

DIRECTIONS:

Wash and completely dry vehicle. Perform any needed preparation steps for a flawless finish (clay bar, polish, etc.). Shake well before use. Apply a small amount of product to a new applicator pad, gently spread over one panel at a time. Allow product to flash 1-3 minutes, gently wipe off residue with microfiber towel. Do not over wipe the panel. Repeat for each panel. Change microfiber towels as needed.
